

Hardware Solutions

Intel Bespoke

We understand that each business has different requirements and guidelines for its working environment, therefore ready-built PC's are not always what you require.

Our specialist team of Technical Consultants qualified to build you a tailor made PC that will meet all your technical specifications giving you the quality IT infrastructure you require.

From your dedicated account manager through to our team of Technical Consultants, you can be assured of an IT solution that gives you quality, functionality and above all cost efficiency.

We will configure and pre-load your machines with your own drive image at the time of manufacture, allowing quick and easy installation on delivery.

Our complete solution also involves us setting up and installing your machines on-site.

From your initial specifications our Technical Consultants will design, build, implement and provide you with the high level of maintenance and support that your IT infrastructure requires to continue optimum performance.
